## SKILLS

React, Redux, Python, Flask, Express, JavaScript, HTML5, CSS3, SQL, PostgreSQL, Sequelize, SQLAlchemy, Git

## PROJECTS

**Leaveit!** (Flask, ReactJS)

[live](#) | [github](#)

*A calorie tracker for dogs, written in JavaScript and Python*

- Built out the majority of the functional components used in the app, such as custom forms, buttons, meal tracker items, etc.
- Implemented the resting energy requirement formula for dogs by combining multiple programming concepts and principles.
- Styled the entirety of the app and organized functional components and their CSS modules into individual directories.

**Cleanstagram** (Flask, ReactJS)

[live](#) | [github](#)

*An Instagram clone built with JavaScript and Python*

- Integrated AWS S3 service to allow users to upload local images and files onto the Cleanstagram application.
- Incorporated Unsplash API and Faker API to populate the application with realistic images, usernames, and emails to demonstrate basic functionalities of Cleanstagram.
- Developed the user page and following features on the application by utilizing Redux thunks and SQLAlchemy table models.

**Yessir!** (Express, ReactJS)

[live](#) | [github](#)

*A Yelp clone built with JavaScript in both Frontend and Backend*

- Built out the entirety of the functional components used in the app, including the search feature, business forms, etc.
- Designed and developed the entirety of the database, including businesses, reviews, and their respective relationships.
- Authored all documentation regarding the application, such as Wiki, API documentation, Feature List, user stories, etc.

**Meowdium** (Express.js, PUG)

[live](#) | [github](#)

*Simple Medium clone built with Pug templating engine and JavaScript*

- Developed a platform for users to
- Implemented dynamic features (likes and comments) using simple technologies such as Pug and DOM manipulation to provide users with features without the browser reloading.
- Cooperated with teammates to make application design decisions such as features, API routes, front-end routes, etc.

## EXPERIENCE

**Technical Support Manager**

*Sceptre Inc.*

Nov 2019 - Nov 2020

- Provide day-to-day troubleshooting for products such as televisions, monitors, and soundbars to customers through phone calls, emails, and live chats; assist customers in resolving additional issues in regard to their systems and configurations.
- Log and report common issues in products to engineering team, as well as inspect current models of merchandise; provide further inputs for foreseeable problems with products in order to prevent additional complications in future products;
- Investigate returned merchandise and attempt to recreate issues according to customer reports; cooperate with other technicians; support quality assurance process by reviewing units as final tests before returning product to customer.

## EDUCATION

**Web Development** - App Academy | June 2021 - December 2021

- Rigorous 1000-hour software development course with <3% acceptance rate

**B.S. in Biology** - University of California, Riverside | 2015 - 2019
